

Account n° 1

Audrey's objectives :

MP3 : be more relentless, stay focus on a subject, learn to be organize and plan ahead
learn how to keep my new knowledge activate

English : learn some vocabulary about the music domain, the music business
write correctly in English without using the dictionary
speak fluently

Audrey's means : readings, organisation, motivation, elaborate "OICs", be active and not passive, reuse my knowledge

Audrey's results : an index about my music knowledge to complete
three songs to try to build the bridge between knowing and doing
personal indicators that correspond to me
and the icing on the cake : a new way of working organized without feeling forced

Thibaut's objectives :

MP3 : Stay focused on a subject, being able to specialize myself in on knowledge. Developing my third MBTI functions : "Si".

English : Improving my knowledge in the domain of Crafts and manufacturing processes. Also, I aim to be able to speak and write about that in English.

Thibaut's means :

To improve knowledge : Publications, Discovery channel show "How it's made", etc...

To practice my knowledge : Publications (Homemade magazines) & SDL Radio, etc...

Thibaut's results :

Notes organized as a database to sum up industrial processes and crafts I've learned.

3 Magazines with differents parts (on processes, indicators, crafts, other people interests ?...)

Personal indicators that correspond to me

FOR BOTH OF US

Our organisation : have a planning about OUR OICs (Audrey : culture notes, write a song with what I have learned; Thibaut : producing notes that serve to build my publications and talks)

We have planned a meeting every thursday to speak about our project's advancement, use accurate indicators of our evolution.

What did we do this week?

- speaking about our personal project
- doing a first sketch of our planning
- finding some tools to be organized (Gmail agenda and docs, how to present our indicators?)
- thinking about the indicators

Indicators

Motivation indicator : gauge (green to red), to measure at the beginning and at the end of the english session -> the aim is to have a graph of our motivation evolution to have a reflexion of when, why we are motivated. Another version could be a daily photograph with body language to express our motivation.

Orientation, efficiency indicators : to write every tasks we want to do for the whole project and for the next session and tick every tasks finished. (cf. Thibaut's Brebion work indicators)

English learning indicator :

The voc' indicator: read a text about the subject studied before and after working on it. Highlight and count the unknown vocabulary. Write it in our publishing/index

The speaking indicator : record a conversation in english about our project and judging it on defined criterias and correcting it.

The writing indicator : do a test every two weeks, write a text without correcting tools and check the mistakes. (write it on a mistakes' page) then add or remove the mistakes. The aim to have no mistake on this page.

However, to establish these indicators we need to refer to our respective objectives. For Thibaut the important is to be understood and not to speak perfectly. So the indicators must be adapted.

What do we do next week?

- find books and website about Fado music (Audrey)
- present our indicators clearly
- work on our OICs (defining empty examples)
